

JUNG TRANSWORLD CO., LTD.

정트랜스월드(주)

□ 솔정(鼎)의 의미

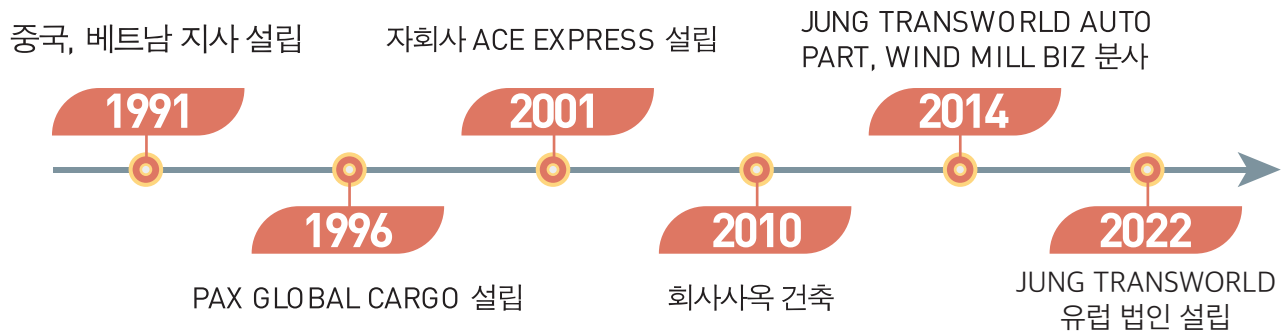

청자의 주관에 따라 情, 正, 鄭 등으로 해석될 수 있으나
삼국지 유비가 삼고초려 후 제갈공명이 내놓은 鼎足之勢의 지혜를 본받고자,
鼎트랜스월드로 명칭하였습니다.

포워딩 고유 업무영역인 영업, 관리, 자금이 각자 안정적인 형세로
흔들림없이 영속되었으면 하는 바램과
국제물류 3대요소인 화주, 선사, 포워딩 어느 한곳의 이익에 치우치지 않고
WIN-WIN BIZ를 만들자는 의미도 내포되어 있습니다.

□ WIN-WIN BIZ

CONTAINER SPECIFICATIONS

At Jung Transworld, we are not only handling oversized cargo. Regular container shipments are a very important part of our business. These specifications are for 'standard' units and should be considered as guidelines only. Other types, than the ones listed on this sheet, are available - please contact your nearest Jung Transworld office for further information.

CLOSED BOX CONTAINERS

	20DC	40DC	40HC	45HC
Internal length	5,897MM	12,301MM	12,031MM	13,555MM
Internal width	2,348MM	2,348MM	2,348MM	2,348MM
Internal height	2,385MM	2,385MM	2,690MM	2,690MM
Width at door	2,337MM	2,337MM	2,337MM	2,337MM
Height at door	2,272MM	2,272MM	2,577MM	2,577MM
Tare	2,290KG	3,770KG	3,990KG	4,880KG
Max payload	21,710KG	26,710KG	26,490KG	25,600KG
Volume	33CBM	67.4CBM	76CBM	85.6CBM

The most used units are the closed box containers (standard containers). They are used for all kinds of cargo and made from either steel or aluminum. The 40' and 45' HC (High Cube) units are ideal for light, voluminous cargo.

FLATRACK CONTAINERS

	20FR	40FR
Internal length	5,958MM	11,986MM
Internal width	2,018MM	2,236MM
Internal height	2,077MM	1,968MM
Width at door	N / A	N / A
Height at door	N / A	N / A
Tare	2,720KG	5,980KG
Max payload	27,760KG	39,020KG
Volume	25CBM	52.7CBM

Flatrack containers are used for heavy and oversized cargo, which cannot be loaded into a container with fixed walls and hence needs loading from top or side. Flatrack containers can be delivered with both fixed and collapsible walls.

OPEN TOP CONTAINERS

	20 OT	40 OT
Internal length	5,898MM	12,022MM
Internal width	2,346MM	2,346MM
Internal height	2,354MM	2,381MM
Width at door	2,338MM	2,337MM
Height at door	2,244MM	2,244MM
Tare	2,450KG	4,020KG
Max payload	21,550KG	26,460KG
Volume	32.6CBM	66.4CBM

Open top containers are often used for heavy machinery which requires loading by crane (from top). They are fitted with a tarpaulin (some with a hard-top) and the door header can in most cases be removed.

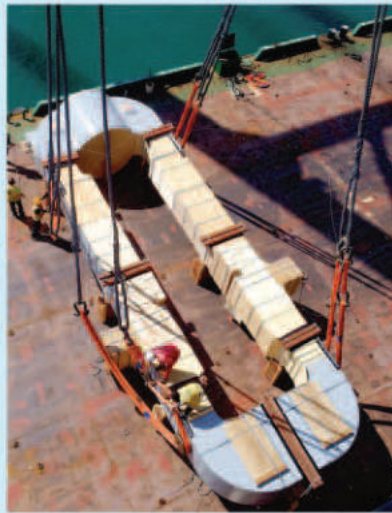

REEFER CONTAINERS

	20RF	40RF
Internal length	5,455MM	11,583MM
Internal width	2,290MM	2,290MM
Internal height	2,262MM	2,538MM
Width at door	2,290MM	2,290MM
Height at door	2,227MM	2,508MM
Tare	2,960KG	4,800KG
Max payload	21,040KG	27,700KG
Volume	28.3CBM	67.3CBM

Reefer containers are the ideal solution for storage or transportation of cargos that need cooling, heating or freezing, such as meat, fish and fruit.

Reefer containers are manufactured to preserve the temperature inside the container at the desired level.
